Hi Everyone,

Thanks for purchasing my Common Core 4th Grade Assessments Packet. I use the 3rd grade version during Math Workshop in my classroom. Math Workshop is the absolute best part of my school day .

I am often asked questions about organizing and managing a Math Workshop which inspired me to put together an eBook detailing exactly how to get started and maintain a Math Workshop with Guided Math instruction in your own classroom. It contains tons of tips and ideas with photos as well as oodles of Printables for conferencing, lesson planning, and more. The following page shows all that is included in that packet.

You can find it at my store at the following link:

[The Clutter-Free Classroom's Guide to Organizing and Managing a Math Workshop with Guided Math Instruction](http://www.teacherspayteachers.com/Product/Guide-to-Organizing-Managing-Math-Workshop-with-Guided-Math-eBookPrintables-800512)

or cut and paste:

<http://www.teacherspayteachers.com/Product/Guide-to-Organizing-Managing-Math-Workshop-with-Guided-Math-eBookPrintables-800512>

While creating that resource I took the opportunity to update this product. I've added additional printables to the original board and also added an entirely new board for free. I'll be using the new black and white version in my own classroom this year. While I left it in it's black and white form, you could also print it onto colored card stock to create a unique look. Take Care, Jodi

This 150 Page Product Includes...

MATH WORKSHOP WITH GUIDED MATH HANDBOOK

40 Page Guide to Organizing and Managing Math Workshop

includes photos, tips, ideas and a list of procedures and routines to teach

10 Page Guide to Kicking Off Math Workshop

includes 10 days of lesson plans along with tips on how to get the Math Workshop started

Volunteers and Their Role in Math Workshop

PRINTABLE RESOURCES

- 2 Math Workshop Rotation Boards
 - Original Best-Selling Board with new pages added
 - Black and White with Pennant Banner Title
- Essential Question Sticky Note Chart
- Teacher Planning Binder
 - 2 covers
 - spine insert
 - divider tabs
- Student Portfolio Binders
 - 2 covers
 - spine insert
 - divider tabs
- Labels for Student Work Folders
- Post-It Note Observation Template
- Anecdotal Note Taking Template
- Student Conferencing Documentation Sheets
- Templates to Group Students (4 versions)
- Lesson Planning Templates (5 versions)
- Math Lab Using Math Tubs Planning Sheets
- Math Lab Partner and Tub Management Display Posters
- Questioning Cards: 24 Cards for Guiding Quality Math Discussions (3 versions)
- Math Thinking Stems for Effective Questioning When Working With Students
- 72 Math Manipulative Bin Labels (fits a variety of storage containers)

EDITABLE FILES

13 Editable Documents are also included for you to type onto directly

Lesson Planner, Grouping/Partner Forming Template, Math Tub Posters, Student Conference Notes & More

4th Grade Common Core Math Assessment Packet

About This Product

I'm so excited to share this product with you because it is one that I have used and LOVE in my own third grade classroom. My students and I are happiest using hands-on learning activities, centers, and projects. However it is also necessary to have a means of collecting data through formal assessments, documenting student progress and using the data to drive future instruction. It was for that reason that I designed every aspect of my Common Core Assessments and Data Packet to be user-friendly, efficient and effective. I am so pleased with the end result.

For each and every Common Core standard I created not one, not two, but THREE assessment pages. I call them assessment pages, but really they could be used as homework, review, morning work, etc. I felt it was important to have more than one assessment per standard so that I could use the results to plan additional instruction and then reassess them to see how they responded to interventions. All three pages are different, but very similar, so that I am truly comparing apples to apples when I analyze their progress.

Each page was designed to be clear, neat, organized and easy to read. The standards are clearly marked on every sheet and there is space at the bottom of each page for notes and the score. I find this section to be the most important. It can be used to write feedback, note misconceptions, set goals, communicate with parents, have the student record personal goals or questions they may have, etc. I've included simple and clear answer keys for all assessments. With the exception of three of the standards, each assessment consistently includes 10 questions so that grading is simple and the data is easy to manage.

Speaking of tracking data...the packet also includes three additional products to assist you and your students with monitoring their progress. The first is a Student Data Notebook. The Student Data Notebook has a choice of two covers and printables for the students to use to chart their scores on each assessment. I recommend having them use a different color marker each month (i.e. red=September, orange=October, yellow=November, etc). These are great for increasing student accountability and provide wonderful visuals when conferencing with students and parents and planning with colleagues.

The next product included is a Common Core-Specific Math Grade Book. It will give you an organized way to record the students' progress on each of the three assessments and to see how they are doing with each standard.

Finally, I have included a collection of graphic organizers that were designed to be used to plan future instruction. After correcting the assessments, I record my students names onto these charts and use that data to plan extensions, interventions, and future small group lessons and activities during my Math Workshop Rotations.

About the Common Core Math Assessments

I designed each of the assessments to offer an accurate and consistent look at student ability. They all have an organized layout which is ideal for data collection, parent conferencing and RTI. Because each page includes 10 questions, they are easy to grade and provide a consistent scale for tracking progress and mastery. All pages include. . .

Common Core Math Assessments

Common Core Math Assessments

Each standard includes three similar, but different assessments. The bottom right hand corner is marked with the assessment number. There are so many different ways you can use these.

I introduce the concept related to the standard to all students over several days through my Guided Math Workshop, Whole Group Mini-Lessons, modeling and through media (books, animated videos, etc) that may be available. I then give them assessment one. I then use the assessments to determine their initial level of understanding and continue to work on targeted needs during instruction. I give them the second assessment to document progress and will then address individual needs if necessary. I use the third assessment at a later date to ensure that they not only reached proficiency, but have retained the concept.

Use assessment one as a pretest, assessment two as a practice page and assessment three as a post test.

Use two as practice pages and one as an assessment.

Use one as a guided lesson, one for homework, and one as a formal assessment.

Use each to check student level of understanding and then use that information to form guided math groups.

4.OA.1
Multiplication as
a Comparison

Operations and Algebraic Thinking

Write a multiplication equation that matches each statement below:

- ① 3 times more than 6

- ② 36 is 9 times more than this number

- ③ 4 times more than 7

- ④ 40 is 8 times more than this number

- ⑤ 7 times more than 5

Solve:

- ⑥ There are 5 boys in my class. There are 2 times as many girls in my class. How many girls are in my class?

- ⑦ Jonah rides 3 miles to school each morning. Amy rides 4 times as far. How far does Amy ride each morning.

- ⑧ The librarian displayed 6 books about dinosaurs on the counter, but there are 7 times as many still on the shelf. How many are on the shelf?

- ⑨ The teacher put butterfly stickers on 8 students' spelling tests. She put rainbow stickers on 3 times that many tests. How many tests have rainbow stickers?

- ⑩ Eli shot 3 times as many baskets as Justin during gym class. Justin shot 4 baskets. How many did Eli shoot?

5)	1	10)	visually assess

Data Notebooks

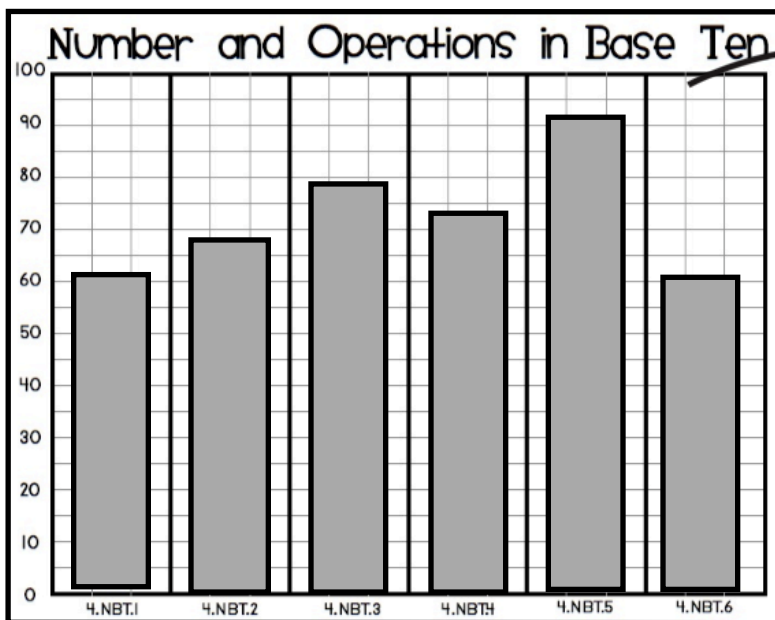

Data Notebooks

Data notebooks are an excellent tool for helping students take ownership of their learning. They provide teachers with a means for planning instruction and allow parents to track their child's progress. Although data can be cumbersome and overwhelming, if kept simple you'll find it to be a useful addition to your classroom.

How to Use Them:

1. Print a copy of each tracking sheet for every child along with a cover. I use the boy cover for my boys and the girl for my girls.
2. Each tracking sheet has 3 columns for every standard. I designed them so that they could be used with my Common Core Assessments. Since there are 3 versions of each assessment, they use one column per assessment. However, if a student demonstrates proficiency on assessment one or two, I do not reassess them.
3. I like to have my students color-code their bars. We use red for September, orange for October, yellow for November, etc. I find this helps to get a better overall picture of their progress.

Core Math
Grade Book**

Common Core Grade Book

I found that it was important to keep data specific to the Common Core Standards to help me keep track of the status of the class. I created these printables specifically to go with the three assessments in this packet, but you could certainly use them with any lessons that align with the standards.

Data-Driven Instruction Lesson Planning Organizers

The
Clutter-Free
Classroom

Lesson Planning Sheets

These have been an amazing tool for planning small group lessons during my math workshop. After grading each assessment I record each student's name in one of the four columns to form focus groups. Some students require interventions, others simply need me to clarify misconceptions and some need me to extend and enrich them,

Student Grouping			
Operations and Algebraic Thinking			3.OA.9
advanced	proficient	progressing	warning

Student Grouping			
Number and Operations in Base Ten			3.N
advanced	proficient	progressing	warning

One set of organizers is just for forming groups or tracking student status. The other includes space for notes on lessons.
